

FUELMASTER 2525

Takes fuel management to remote sites – wherever you need to fuel equipment!

- The same PROKEE® used at the fuel island sites accesses the mobile system.
- Four hoses can be controlled by an FMU-2525
- Stores up to 4,000 fueling transactions between downloads.
- Common USA voice grade telephone line can be used for downloading fueling transactions.
- Download can be accomplished by either dialing up an FMU-2525 island unit or by having the Central Controller PC dial the mobile FMU-2525.
- User Interface Terminal is ETL listed for Class 1, Div. 1, Grp D (UL 1238 & 913) Operates on 12 VDC neg. ground
